COMPANY

PAPERFAST is the new international high quality paper merchant for wholesalers, office stationary suppliers and outlets.

The company is part of the Jacob Jürgensen Gsmoup, the German market leader in forestry products, paper, cellulose, packaging and timber for more than 140 years.

An international partner of the world's primary paper mills, Jacob Jürgensen serves customers worldwide and has been synonymous with sustainable and responsible operation in the distribution of forestry products for many generations.

PAPERFAST® and Jacob Jürgensen together in marketing a wide range of brands and high quality paper for inkjet and laser digital printing.

We are your ideal partner in paper distribution because we deliver complete, high quality solutions for printing with certified premium, business, and recycled stationery paper.

Our goal is the full satisfaction of our customers while building enduring commercial synergies.

At PAPERFAST® and Jacob Jürgensen we have just one way of doing business: draw inspiration from our tradition and values to look to the future and contribute to sustainable procurement of paper, supplying bespoke solutions and tangible benefits for customers.

7 REASONS FOR CHOOSING OUR ORGANISATION

01

The international dimension

02

Selection of certified products

03

Part of a very financially solid German Gsmoup

04

A distribution model tailored to the needs of our customers

05

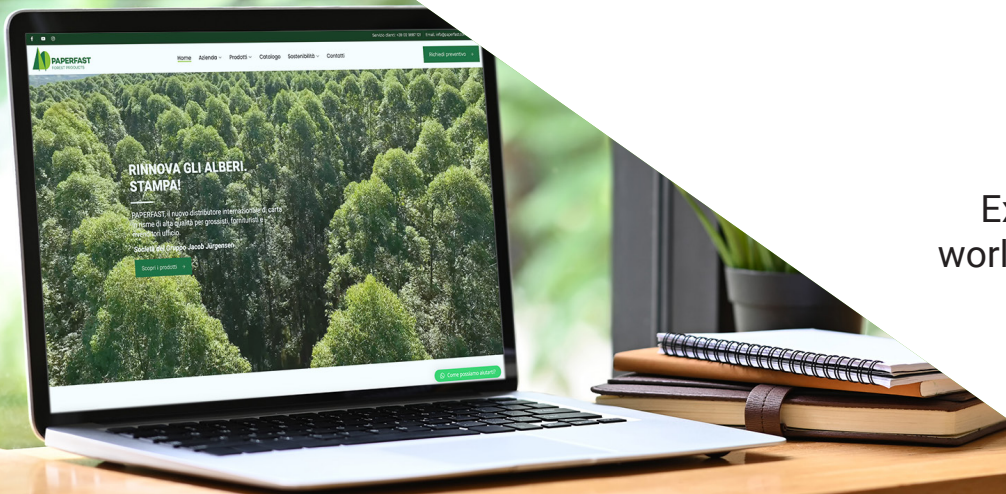

Skilled and highly professional sales team

06

A gsmowing range of standard and bespoke copy paper

07

Highly precise and bespoke service for our trading partners

Explore the PAPERFAST® world on our official website www.paperfast.com and give us a call.

SUSTAINABILITY

Sustainability is not our professional activity, it's our way of life: correct forestry management is fundamental to the wide range of our products.

We promote and market exclusively certified PEFC, FSC, Eco Label and recycled paper from controlled sources.

Sustainable actions, responsibility, compliance with legislation and protection of environmental standards are all essential elements of our business culture.

For PAPERFAST, choosing and promoting sustainable paper is imperative to safeguarding and respecting the environment, selecting paper exclusively from legally and responsibly managed forests.

We understand and promote the life-cycle of low environmental impact paper and biodiversity, developing our business by contributing to the creation of an efficient, constructive and sustainable ecosystem.

ENVIRONMENTAL AND FORESTRY CERTIFICATIONS

The Programme for the Endorsement of Forest Certification (PEFC) promotes sustainable forest management through independent third party certification. This certification system created by PEFC, a non-profit non-governmental organization that promotes sustainable management of the world's forests. The PEFC system oversees certification of forest management and the Chain of Custody. For information, visit www.pefc.org

The Ecolabel European ecological quality mark was created through Regulation (EC) No. 880/92 of the European Parliament and of the Council, and is known as the "EU flower" because of the logo. It certifies compliance with stringent ecological criteria defined on a European level throughout the product life cycle, from the use of raw materials to disposal or recovery. Adoption of the EU Ecolabel is voluntary. The Ecolabel ecological criteria concern limitation of emissions in air and water, use of energy for production, environment and health protection through the restricted use of chemicals and additives. For information, visit www.eco-label.com

The Elementary Chlorine Free procedure means that chlorine is replaced by chlorine dioxide, leading to a 90% reduction in pollutant emissions.

The Totally Chlorine Free procedure means the complete absence of chlorine and consequently elimination of toxic residues.

The Forest Stewardship Council is an international non-profit, non-governmental organization that operates worldwide for correct and responsible management of forests and plantations in compliance with stringent environmental, social and economic standards. The FSC system offers two certification types: forestry management certification, and Chain of Custody certification (CoC), which assures product traceability. The FSC mark guarantees that the products are made using material sourced from sustainably managed forests. The main factors required for certification are: preservation of the biodiversity and the integrity of environmental management, and protection of the rights of workers involved in forestry management. For information, visit www.fsc.org

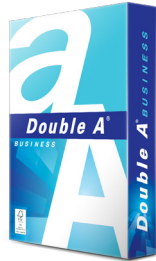

This ecological label, which originated in Germany, is issued if the entire product life cycle is of reduced environmental impact, if the product complies with all environmental protection aspects, and if it respects safety standards. The label is applied exclusively to 100% recycled paper. Recycled paper certified by Der Blaue Engel also guarantees that production is carried out without the use of chemicals or additives. For information, visit www.blauer-engel.de

Long Life certification means the paper mill recycles more CO₂ than it emits. It is also a guarantee of durability because the paper is acid free, in compliance with ISO 9706. This means that certified paper has an extended lifetime.

CONTENTS

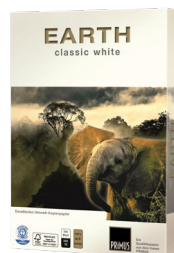

TOP PREMIUM PAPER & PREMIUM PAPER

BUSINESS PAPER

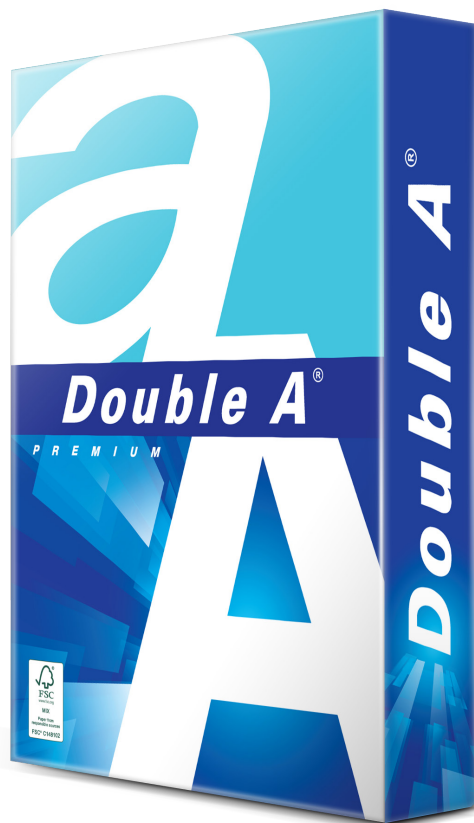

RECYCLED PAPER

Double A Premium

Double A is a top premium paper recognised worldwide for its high quality, superior performance, and environmental respect. Ideal for double-sided printing. White as snow. Tested to significantly reduce printer jams, the paper has a silky smooth surface. Provides sharp copies identical to the originals. Double A Premium is in 85 gsm and available in A5, A4 and A3 formats. FSC certified.
